WORK EXPERIENCE

Cannabis Warehouse Australia • Remote — 11/2025 - Present

Full Stack Developer

- Developed and maintained a full-featured e-commerce platform using Laravel, Livewire, Tailwind CSS, and Alpine.js, delivering scalable and high-performance solutions with responsive user interfaces. Improved system usability and enhanced overall user experience.
- Integrated CartonCloud and Xero APIs to synchronize inventory, orders, and financial data across multiple systems, enabling seamless data flow and improving operational efficiency and accuracy.
- Developed and managed real-time webhooks to automatically update portal records based on external system events, reducing manual processes and ensuring data consistency across platforms.

Techleadz • Lahore — 07/2021 - 10/2025

Software Engineer

- Developed and maintained multiple web applications using PHP, Laravel, CodeIgniter, ColdFusion, Ruby on Rails, React, and Salesforce LWC across diverse industries including e-commerce, HR management, recruitment, healthcare, and campaign management systems.
- Built scalable and user-friendly solutions with a strong focus on performance, business automation, and responsive UI development, improving overall system efficiency and user experience.
- Worked on third-party API integrations, webhooks, database management, and real-time system synchronization to streamline business operations and ensure reliable data flow across platforms.

- Collaborated with cross-functional teams to deliver high-quality enterprise solutions, troubleshoot complex issues, and implement new features based on business requirements.

High App Solutions • **Lahore** **08/2020 - 06/2021**

Full Stack Laravel Developer

- Developed and maintained backend APIs for multiple Android applications using Laravel, ensuring secure, scalable, and high-performance system architecture.
- Designed and managed admin panels, including UI development and core functionalities, to streamline business operations and improve user management workflows.
- Worked on multiple projects involving API integrations, database management, authentication systems, and real-time data handling to deliver reliable and efficient applications.
- Collaborated with development teams to implement new features, optimize application performance, and deliver business-focused solutions within project timelines.

PROJECTS

Various web projects

Worked on multiple web applications and e-commerce solutions, contributing to both backend development and frontend functionality across different project domains.

TaskMania (CodeIgniter)

Developed a complete management system including task management, HR module, leave management, and workflow tracking to improve organizational productivity.

Medical Management System (ColdFusion, SQL Server)

Built a secure web application for maintaining patient records and medical data management with a focus on data integrity and accessibility.

Campaign Management System (Laravel, Mysqli)

Developed a system to manage and track multiple marketing campaigns with efficient data handling and reporting features.

User Posts Application (Laravel, Mysqli)

Created a social-style platform where users can create posts and others can like or dislike content, implementing core interaction features and database logic.

E-Commerce Website (Core PHP)

Developed an online book store allowing users to browse by categories/sub-categories, manage cart items, and complete purchases with a smooth user experience.

EDUCATION

Master of Computer Science (MCS)

Virtual University of Pakistan • Multan 01/2018 - 06/2020
